

AWS Cloud Practical

Name: Pooja Prakash Belgaumkar

1. Create a public + private route table and associate subnets.

- For this task, we need one VPC with public and private subnets and an Internet Gateway attached to the VPC.
- Then we will create route table for public subnet.

The screenshot shows the 'Create route table' page in the AWS Management Console. The breadcrumb navigation at the top reads 'VPC > Route tables > Create route table'. The page title is 'Create route table' with an 'Info' link. A descriptive text states: 'A route table specifies how packets are forwarded between the subnets within your VPC, the internet, and your VPN connection.'

Route table settings

Name - optional
Create a tag with a key of 'Name' and a value that you specify.
Public-RT

VPC
The VPC to use for this route table.
vpc-06549755af9e6dc0d (My-VPC-1)

Tags
A tag is a label that you assign to an AWS resource. Each tag consists of a key and an optional value. You can use tags to search and filter your resources or track your AWS costs.

Key
Q Name X

Value - optional
Q Public-RT X Remove

Add new tag

You can add 49 more tags.

Cancel Create route table

a. Public route table

- Add **Internet Route** with destination 0.0.0.0/0 and target Internet Gateway to Public-RT to make the subnet public.

Edit routes

Route 1

Destination
10.1.0.0/16

Target

local

Status

✓ Active

Propagated
No

Route Origin

CreateRouteTable

Route 2

Destination

0.0.0.0/0

Target

Internet Gateway

Status

-

Propagated
No

Route Origin

CreateRoute

Remove

- Then associate public subnet with public route table.

Save associations

b. Private Route Table

- Create Private route table in the same VPC as public.
- For Private route table we do not attach the internet route.

Create route table [Info](#)

A route table specifies how packets are forwarded between the subnets within your VPC, the internet, and your VPN connection.

Route table settings

Name - optional

Create a tag with a key of 'Name' and a value that you specify.

Private-RT

VPC

The VPC to use for this route table.
